

## XML documentation for importing products to Programastatybai.lt

Field	Type	Explanation	Required
<b>products</b>	array	This is the root element of the document.	Yes
<b>product</b>	array	Each product record should be enclosed in this tag.	Yes
<b>title</b>	string	Title of product as shown in customers shop.	Yes
<b>item_price</b>	decimal	Final price of item (taxes included).	Yes
<b>manufacturer</b>	string	Manufacturer title of product.	Yes
<b>image_url</b>	string	URL for main image. Clearly visible front facing image of product.	Yes
<b>product_url</b>	string	URL of product page.	Yes
<b>categories</b>	array	One or more categories enclosed in this tag, each category title enclosed in 'category' tag. Category should be provided as '/' separated path of category tree (for example: Blocks/Concrete Blocks).	Yes
ean_code	string	Also known as bar-code.	Highly recommended
delivery_time	int	Expected delivery time in days.	Highly recommended
delivery_text	string	Short text describing delivery terms (ie. 0-2 d.d.)	Highly recommended
description	string	Description of product.	Recommended
stock	int	Number indicating current stock count of product.	Recommended
eans	array	If product has more then 1 ean, it can be passed as array (`eans` element, with `ean` tags as children, each containing single EAN code)	Recommended
manufacturer_code	string	Manufacturer code (usually referred to as MPN). This code uniquely identifies a given product and its variations in manufacturers system. If provided correctly it greatly enhances our ability to automatically match different products.	Recommended
model	string	Model of product. For example if the product in question is Concrete Blocks Dekor BR 8, this field would contain Dekor BR	Recommended
additional_images	array	Additional images for product. For example product from different angles.	Recommended
specs	array	Specs of product (things like dimensions, weight, etc...). Each individual spec value should be enclosed in 'spec' tag (spec name should be provided as attribute 'name').	Recommended

See sample product XML on next page.
